***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: Applicants' process for depressing corrosion of a metal material of a reactor while producing 1,1,1,3,3-pentafluoropropane is unobvious over the prior art of record because the prior art of record does not teach or suggest depressing the corrosion of a metal material of a reactor while carrying out a hydrofluoric acid reaction in the presence of an antimony pentahalide catalyst (acids such as hydrofluoric, hydrochloric, hydrobromic, etc., are known to corrode metals in the art). All claims (1-4) are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
